Corrigendum

Corrigendum to “Guidelines for preparing color figures for everyone including the colorblind” [Pharmacol. Res. 119 (2017) 240–241]

Robert Roskoski Jr.

Blue Ridge Institute for Medical Research, 3754 Brevard Road, Suite 116, Box 19, Horse Shoe, NC, 28742, USA

The statement “The primary colors are red, green, and blue” was incorrect. It should be “The primary colors are red, yellow, and blue.” Also, the link for uploading figures to determine how they are perceived by the colorblind (<http://vischeck.com/>) is no longer available.

However, additional freeware for the evaluation of color figures includes: (i) <https://www.color-blindness.com/coblis-color-blindness-simulator/> and (ii) <https://www.ryobi-sol.co.jp/visolve/en/tryonweb.html>.
